THE BIG FIVE
DE GROOT VYF

Elephant (*Loxodonta africana*)
Herds of 6 to 200, with an elephant cow as leader, are common. Old bulls wander alone or with smaller herds of young bulls. South Africa's 8 bull elephants are found mainly in the Addo Elephant and Kruger National Parks. Painting by Denis C Murphy.

Oskant (*Loxodonta africana*)
Trokke van 6 tot 200, met 'n oifantkooi as leier, is alge-
meen. Ou bulle loop geneeslike alleen of saam met kleiner
trokke jong bulle. Suid-Afrika se 8 bulle oifante word hoof-
saaklik in die Addo-oifantpark en die Nasionale Kruger-
wiltuin aangetref. Skildery deur Denis C Murphy.

THE BIG FIVE
DE GROOT VYF

Leopard (*Panthera pardus*)
The leopard can live in various habitats: from high moun-
tains to coastal plains and low or high rainfall areas.
Worldwide it is considered as an endangered species.
An estimated 600 live in the Kruger National Park. Painting by Denis C Murphy.

Lupard (*Panthera pardus*)
Die lupard kan in verskeie omgewings aangetref word: van hoë
berge tot laaggebiede en tot of hoë reënvalgebiede. Die
wêreld wêreldwyd as 'n bedreigde spesie beskou. Sowel
600 luparde word in die Nasionale Krugerwiltuin aangetref.
Skildery deur Denis C Murphy.

THE BIG FIVE
DE GROOT VYF

White Rhino (*Ceratotherium simum*)
This animal is no more white than the Black Rhino is
black. The corruption of the Afrikaans word for wide,
referring to the broad mouth, led to its name. Approximate-
ly 4 700 White Rhino can be found in conservation
areas in South Africa. Painting by Denis C Murphy.

Witrenoster (*Ceratotherium simum*)
Hierdie dier is net so min wit as wat die Swartrenoster
swart is; die naam is te danke aan die verwarring wat
die Afrikaanse woord wyd, met die op sy breë bek,
Oor se ~4 700 Witrenosters in bewaeringsgebiede
in Suid-Afrika. Skildery deur Denis C Murphy.

BLACK EAGLE *Agosia vociferans*

This large pied eagle builds its nest of sticks on rocky hills, since the hyenas, its principal prey, are found here. The species, still widespread in South Africa, remains safe in its mountain fastness except where it comes into conflict with farmers of small stock.

WITKRUISAREND *Agosia vociferans*

Die groot gespikkelde arend bou sy nes van stokkies op rotsheuwels omgewen sy hoofjasse, die klipdassie, daar voorkom. Die spesie kom steeds algemeen in Suid-Afrika voor en is veilig in sy bergpating behalwe wanneer dit bots met kleinveeboere.

BATELEUR *Terathopius eboracatus*

This eagle with its upturned wing-tips and short tail is the most conspicuous in Africa as it flies low over the savanna in search of its prey. The species has been eliminated from much of its former range in South Africa.

BERGHAAN *Terathopius eboracatus*

Die berghaan met sy opgewaarde vlerkspitse en kort stert is die opvallendste in Afrika. Hy vlieg laag oor die savanne op soek na sy prooi. Die spesie is heelwat uitgedien in sy vorige jagveld in Suid-Afrika.

TAWNY EAGLE *Aquila rapax*
 This medium-sized eagle found in the woodland, savanna and steppe habitats of Africa, eats any small animals, taking them as carrion after swift flights or robbing other predatory birds. Its numbers have been drastically reduced through poisoning and persecution.
BOOFAREND *Aquila rapax*
 Die middelgrootse arend wat in die boswoud, savanne- en steppesgebied van Afrika voorkom, vreet alles van enige klein diere. Hy vang dit uit die lug uit of steel dit van ander roofdiere. Die roofarend is drasties verminder deur vergifliging en vervolging.
